

ELECTRIC HEATER

Convection type heater MT series

Heater for heating in a ship, a vehicle, the factory

There is a heater in a steel sheet case. so It becomes the double insulation structure electrically. It is a type to heat the room by a convection on the average.
No heat irregularity, silently. It is a Clean heater.

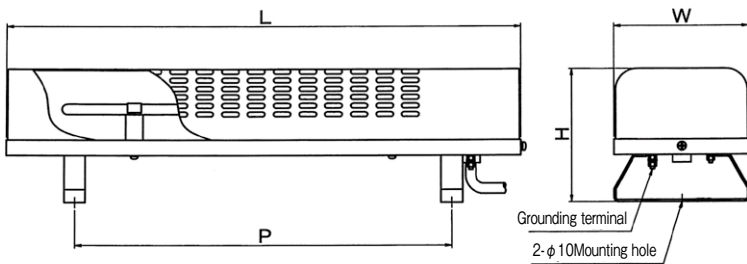

MT-33

●Specification

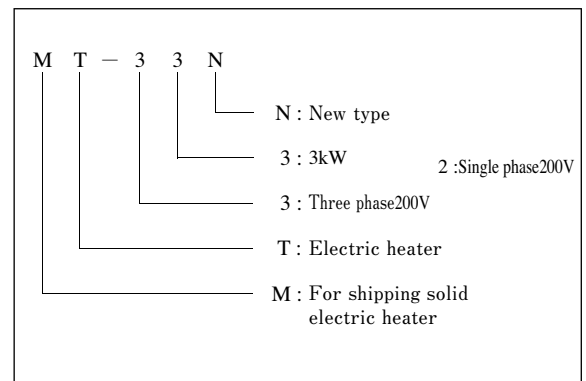

- 1) Power supply : Single phase AC100V、Single phase AC200V、Three phases AC200V
- 2) Heater : SUS304 outside diameter ϕ 12 Sheathed heater
- 3) Power cable : 2m cable
- 4) Case materials · Paint color : Steel plate punching t1.2 2.5G7/2
- 5) Installation : In the installation hole of two places of bents, attach the main body horizontally.

●Purpose

Can use the place with much vibration and place with many comings and goings of the person.

Convection heater MT series Form table

Model	Voltage(V)	Capacity(W)	Number of phase	Length(L)mm	Width(W)mm	High(H)mm	Mounting pitch(P)mm	Weight(kg)	Code No.
MT-11	100	1	Single phase	600	160	160	440	4.6	A27050001
MT-12	100	2	Single phase	800	160	160	640	5.8	A27050004
MT-21	200	1	Single phase	600	160	160	440	4.6	A27050002
MT-22	200	2	Single phase	800	160	160	640	5.8	A27050005
MT-31	200	1	Three phase	600	160	160	440	4.5	A27050003
